

A to Z of e-safety

At the speed the Internet and technology evolves, it's almost impossible to keep on top of e-safety. To make it easier, Alan Mackenzie takes it one letter at a time.

#oeSafeguarding
www.oego.co/A-Z

EDUCATION

The most important aspect to being safe.

DIGITAL FOOTPRINT

Do you understand where your information goes when you put it online and what it can be used for? What are you really happy sharing?

CHILD ABUSE

There are different forms of abuse; the protection of children from harm is paramount.

BEHAVIOUR

We learn to be respectful and polite in the physical world, why should this be different in the digital one?

ANONYMITY

You can be whoever you want online, but so can everyone else, think disinhibition.

KEYLOGGER

The act of recording the keys struck on a keyboard.

JAILBREAK

A process of removing restrictions from a device.

INAPPROPRIATE

Be mindful that what you do online doesn't hurt others, yourself and doesn't break the law!

HACKING

How can people steal your information? How can you keep it safe?

GAMING

The Internet isn't always scary – it holds endless opportunities for education and creativity!

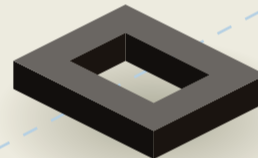

FRIENDS

You can have lots of fun with your friends online, but how many of your online friends would you invite for tea?

PRIVACY

Make sure you know how to adjust your privacy settings on your apps and devices.

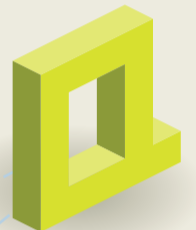

ONLINE BULLYING

Comments made online will stay there forever, and it's much easier to be make hurtful comments when you're hiding behind a screen.

NOMO

(no mobile, similar to fomo) Some people can feel anxious if they have lost or misplaced their mobile, and not due to the cost of replacement!

QUIZ

There are endless myths and false information online. Think critically, question yourself. If it sounds too good to be true it probably is.

MONITORING

One way of assuring there is no inappropriate behaviour.

LOCATION

Extremely useful to stop getting lost, but remember, your location isn't always secret.

VIRUS

Malicious code designed with a specific function.

UNENCRYPTED

It can be easy to lose data; where possible encrypt devices such as laptops, USB pendrives etc.

SEXTING

Never be pressured into taking, sending or putting something online. A sexually explicit image of a person under the age of 18 is illegal.

REPUTATION

What you put online stays online. Your reputation is very important.

YOUTUBE

With adequate filters applied, YouTube is an excellent platform for finding educational videos.

ZZZZZZZ

Take a break – if you use your mobile just before bed you won't sleep as well.

XBOX

There are endless opportunities for fun and creativity with gaming, but as you can also make friends through gaming communities you need to be aware of e-safety behavior.
